Intergen was established in 1999 and since then people, life, and science were its three core values. Performing 90% of its tests with its own designs, developing new methods in its business, finding many new types of diseases, conducting diagnostic studies even for very rare diseases, and offering solutions are part of Intergen's honored efforts. Intergen is an institution that works for spreading awareness of rare diseases in Turkey and all around the world, by owning a vision and business culture about bringing importance to internal and external opinions and training many people in Turkey and abroad.

## OUR SERVICES

- Clinical Counseling
- Pregnancy Losses – Risky Pregnancies
- Prenatal Diagnosis
- NIPT
- Preimplantation Genetic Test (PGT)
- Preimplantation Genetic Aneuploidy Screening
- Whole Exome Sequencing (WES)
- Whole Genome Sequencing (WGS)
- Cancer Genetic Tests
- Preventive Medicine
- Neonatal Risk Analysis
- Screening Tests Before Marriage and Pregnancy
- Infertility
- Pharmacogenetics
- HLA Tests
